

REVOLUTION IN EVERY RESPECT

The revolutionary one-piece bolt action rifle provides more stability and, as a result, more precision. The innovative aluminium synthetic stock with handcrafted leather elements on the forend, cheek-piece and pistol grip offers a perfect grip and elegant design. The trigger unit can be easily removed without tools and stowed in the butt. The butt plate can also be removed in a few easy steps and can be adapted to personal requirements. A successful innovation for modern hunters of tomorrow.

RELIABILITY. An all-steel weapon for absolute toughness made according to military standards.

PRECISION. New „Monobloc“ construction – barrel and housing are made from one single piece for best accuracy.

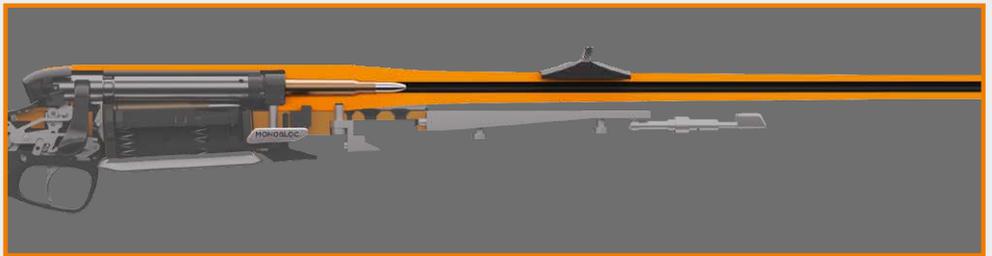

SAFETY. State-of-the-Art safety features like hand-cocking-system, bolt lock and removable trigger unit.

ERGONOMICS. Top ergonomic stock with numerous, innovative options to adapt.

Barrel and housing unite ...

... for highest precision and reliability !

DER ANBLICK

Test 3/2021

Convinces with exceptionally good shooting performance.

ELEGANT PERFECTION

The STEYR MANNLICHER SM 12® with its ergonomic and easy to operate **hand cocking system (H.C.S.™)** sets new standards for all hunting situations.

The new designed stock with Bavarian cheek-piece and elegant checkering gives this rifle a timeless elegant look.

The **O.B.P.™ (optimised barrel profile)** with new barrel lengths and optimised barrel contour features accuracy and fits perfect in the stock and system. These features, combined with its unique design, result in the ultimate rifle for the most discerning shooter.

Bolt Lock for SM 12®

A new feature for the STEYR MANNLICHER SM 12® is now available! A bolt lock, which prevents from unwanted opening of the bolt when the rifle is in safe position.

STEYR SM 12 BREEZE CARBON

PERFECTLY SILENCED

STEYR CL II BREEZE

Perfect sound suppression with optimised blast characteristics combined with ideal weight distribution for maximum guidance – all with the accuracy only provided by the cold-hammer-forged barrels from STEYR ARMS. The STEYR BREEZE models are available as SM12 and CL II with wooden stock (3,50kg/6.7lbs) or weight-reduced

carbon stock (3,05kg/7.7lbs). The STEYR BREEZE has a 407mm stainless barrel and an integrated carbon silencer (please order separately). The CL II BREEZE come with a 2-stage trigger and has 3 position safety, trigger safety, bolt handle and firing pin lock. The hand cocking SM 12 BREEZE features a fine tuned trigger with forward set trigger.

Original Accessories for STEYR Carbon

- Picatinny rail forearm € 108,-
- Flex sight € 228,-
- Flex muzzle break € 192,-
- Flex muzzle cap € 24,-

STEYR FlexSight

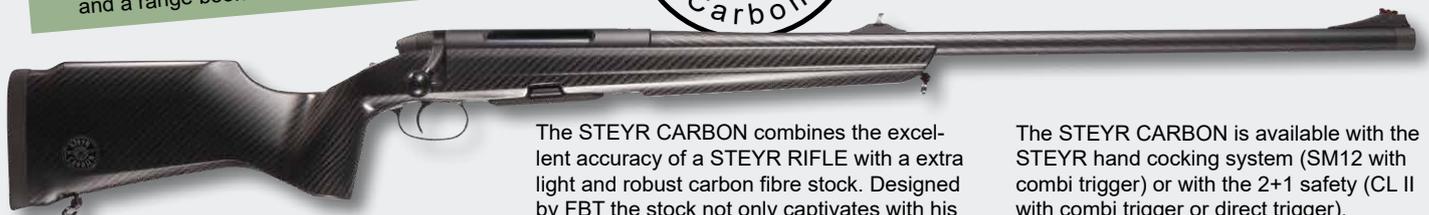

A special thread allows to change from open sights to silencer or muzzle brake without the need of any tools.

Every STEYR CARBON comes with the exclusive CARBON rifle bag, a CARBON cap and a range book. Without surcharge.

ULTRALIGHT AND SOLID

The STEYR CARBON combines the excellent accuracy of a STEYR RIFLE with a extra light and robust carbon fibre stock. Designed by FBT the stock not only captivates with his light weight and the high stability, it is also a "quiet" carbon fibre stock with the same acoustic characteristics as a wooden stock.

The STEYR CARBON is available with the STEYR hand cocking system (SM12 with combi trigger) or with the 2+1 safety (CL II with combi trigger or direct trigger).

RIMFIRE RIFLE

New

threaded barrel
1/2 x 20 UNF

STEYR MANNLICHER ZEPHYR II

The small bore rifle sets totally new standards in the segment of rifles for rimfire cartridges. The official journal of NRA "AMERICAN HUNTER" confirmed this in December 2018 by announcing the STEYR MANNLICHER ZEPHYR II as Rifle of the Year 2019. Further Awards received the rifle from GRAY'S BEST and SPORTING CLASSICS.

Bolt action rimfire rifle - features: classic wooden stock with Bavarian cheek piece, checkered grips and handguard. With the typical STEYR MANNLICHER bolt handle and slide safety.

SMALLER – LIGHTER – QUIETER

The STEYR ARMS suppressors achieve best performances with the help of the so-called "Virtual Volume" - an innovative technology that takes STEYR ARMS straight from zero to the top in the segment of sound suppression.

The suppressor is available in two versions: as a thread-on silencer (STEYR BREEZER MSD) and as an overbarrel silencer (STEYR BREEZER OSD).

STEYR BREEZER MSD and OSD are suitable for caliber 6,5-7,62, 6,5x55SE, .30-06Spr., .308Win., .300WM as well as all calibers .30 .

AKAH NEOPRENE COVER for Breezer OSD

3mm Neoprene with Cordura insert against mirage.

67064.231 230 mm long € 24,90.

MANNLICHER SCOUT € 2.288,-

Due to its short overall length of just 98 cm and the low weight with approximately 3 kg, the MANNLICHER SCOUT is the perfect rifle to be utilized universally.

An additional five or an optional ten-cartridge-magazine, can be accommodated in the hollow well of the ergonomically shaped

synthetic stock. This is not the only detail, which makes this lightweight rifle practical and universal. When necessary, the bipod, which is integrated in the stock's forearm, can be unfolded. Thus, the round will be precise even when no other support is available.

SCOUT Green (on request)

SCOUT Mud (on request)

threaded barrel
5/8-24 UNEF

STEYR THB € 2.088,-

A special model for Long Range shooters as well as hunters in caliber 6,5mm Creedmoor based on the reknown PRO HUNTER Heavy Barrel with an olive coloured STEYR

SX-stock that resists weather and rough use, a 635mm long barrel with muzzle thread (5/8-24 UNEF) and a Picatinny rail.

with adjustable comb

MANNLICHER PRO VARMINT € 2.802,-

With the high-precision fluted, heavy barrel in a stainless finish, the MANNLICHER PRO VARMINT is an excellent rifle for hunting small predators and varmint as well as for extensive training and competitions at the shooting range.

Green STEYR SX stock with adjustable comb. Matte black MANNNOX system. Fluted stainless heavy barrel. Typical MANNLICHER forged barrel. Direct trigger. T.B.H. Tactical Bolt Handle. Picatinny rail for easy scope mount!

STEYR SSG 04 from € 3.258,-

The STEYR MANNLICHER SSG 04 in cal. 308 Win. and 300 Win. Mag. was designed giving high accuracy, ease of maintenance, reliability and robustness for both sport shooters and law enforcement personal. The SSG 04 comes fully equipped with muzzle brake, Harris-bipod, high capacity magazine, adjustable cheek piece and butt plate.

The STEYR SSG 04 A1 is a slightly modified version of the STEYR SSG 04. With a long rail Picatinny system (Mil. Std. 1913), adjustable cheek piece and butt plate, high capacity magazine and a muzzle brake developed by STEYR MANNLICHER it has every technical detail required for precise results.

STEYR SSG 08 from € 6.082,-

The ultimate precision rifle, developed by professional shooters for highest demands. The STEYR SSG 08 offers numerous useful features for the perfect shot, including trail spade, various adjustable Picatinny rails (Mil. Std. 1913) for mounting tactical equipment and a lockable Versa-Pod.

STEYR SSG M1 from € 11.152,-

The new STEYR SSG M1 marks a new step in evolution of sniper rifles. Based on traditional virtues like precision and reliability a whole range of new features enables the shooter to improve his shooting performance. With Muzzle break, KeyMod™ foreend, foldable aluminium stock, adjustable butt stock, top picatinny rail 30 MOA, heavy duty bolt and Harris bipod.

HS .50 M1 € 8.964,-

The STEYR HS .50 opens an era of long-range shooting. The cold hammer forged barrel ensures excellent precision up to a distance of 1500 m. Directly after assembly, the weapon is ready for use. Taking off the barrel complete with optics takes only a few seconds. The 'Side Loading Magazine' enables to switch the magazine without changing the position.

Comes without scope.

STEYR HS .50 € 6.684,-

The STEYR HS .50 is a long range, high precision rifle, with an effective range of up to 1,640 yards (1,500 m). It was designed as a single shot bolt action rifle, and is available in the caliber .50 BMG. The STEYR HS .50 features a cold hammer forged fluted barrel, adjustable bipod, and a highly efficient muzzle brake, which reduces recoil

substantially to increase shooting comfort. The top mounted Picatinny rail (Mil. Std. 1913 rail) allows quick and easy installation of various optics, or night vision devices.

The STEYR HS .50 is designed to field strip easily for transportation or maintenance purposes.

STEYR AUG-Z Sport € 2.798,-

The STEYR AUG Z is the civilian version of the world-famous STEYR AUG - a gas-operated semiautomatic rifle with a Picatinny rail (Mil. Std. 1913) which allows quick attachment of various optic devices. The cold hammer forged and hard chrome plated barrel with a twist rate 1 in 9" guarantees high reliability.

RUGER PRECISION RIFLE®

Ruger Precision Rifle
cal. .338 Lapua Magnum

Ruger Precision Rifle™

Ruger® Precision MSR stock with QD sling attachment points features a bottom Picatinny rail and soft rubber buttpad. The left-folding stock hinge is attached to an AR-style buffer tube and accepts any AR-style stock. Barrels can be easily replaced by a competent gunsmith using AR-style wrenches and headspace gauges.

Also included: two 10-round Magpul® PMAG® magazines. 20 MOA Picatinny rail secured with four, #8-40 screws for increased long-range elevation capabilities.

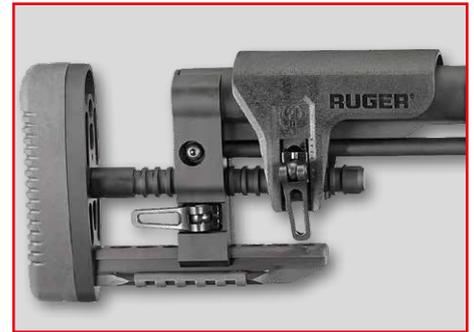

Cold hammer-forged 4140 chrome-moly steel barrel with 5R Rifling at minimum bore and groove dimensions, minimum headspace and centralized chamber. Three-lug bolt with 70° throw features dual cocking cams and a smooth-running, full diameter bolt body.

Oversized bolt handle for positive bolt manipulation, with 5/16"-24 thread for easy replacement. Bolt disassembly tool is stored in the bolt shroud for easy striker channel cleaning.

Ruger Marksman Adjustable™ trigger is externally adjustable with a pull weight range of 2.25 to 5.0 lbs; wrench is stored in the bolt shroud.

More features:

- Ruger Precision Rifle™ Hybrid Muzzle Brake
- Equipped with a Ruger Precision Rifle™ Short-Action Handguard for improved scope clearance for long-range scopes
- 15" free-float M-LOK® handguard of black anodised aluminium
- ambidextrous manual safety

HAENEL

RS 8 / RS 9

The whole is more than the sum of the parts

The RS family was developed to meet the requirements of the professional user.

Haenel has complete control of production of all key components of the RS family rifle system. The barrel, receiver and bolt action are all produced in Suhl/Germany.

The ergonomic concept is based on a tool-less adjustment of the gun with the support of

"quick" adjustments. The Stock can be adjusted not just in length, but also in height. The cheek-rest, which is also adjustable in height. The precise trigger action can be adjusted for pull resistance, trigger pull and longitudinal position and take up pull. (Adjustable trigger weight: 10 - 20 N.) The pistol grip adapter (AR 15 style) allows the user to select from a wide variety of different pistol grips.

The modular concept is based on the universally recognised interfaces for accessories; from the pistol grip adapter to the mounting rails for aiming devices and accessories (Nato STANAG 4694). A Nato STANAG 4694 rail is milled into the system housing, this permits highest precision connected with a low line of sight. A further Nato STANAG 4694 rail is integrated on the bottom of the chassis in front of the hand-guard.

RS 8 Basic

Comes without scope, bipod and .ground spike.

RS 8 Subsonic

RS 8 Compact

RS 8 Basic:

Base for a wide action radius and optimised for shooting on long distances. Optional: bipod, special case.

TECHNICAL DATA

- Length: 1.120 mm (folded stock 880 mm)
- Width: 75 mm (folded stock 90 mm)
- Height: 185 mm (without scope)
- Barrel diameter: 22 mm

RS 8 Compact:

Compact rifle with a short and heavy barrel for maximum accuracy on average shooting distances with an optimal handling.

TECHNICAL DATA

- Length: 1.030 mm (folded stock 830 mm)
- Width: 75 mm (folded stock 90 mm)
- Height: 185 mm (without scope)
- Barrel diameter: 22 mm

RS 8 Subsonic:

Twist is especially adjust for subsonic ammo (220/240 grain) and silencer.

TECHNICAL DATA

- Length: 1.196 mm (folded stock 980 mm)
- Width: 75 mm (folded stock 90 mm)
- Height: 185 mm (without scope)
- Barrel diameter: 35 mm (incl. silencer)

RS 9:

The HAENEL rifle system RS9 is the magnum variant of HAENEL RS8. The effective range is 1500 m. Optional: Tactical silencer.

TECHNICAL DATA

- Length: 1.275 mm (folded stock 1.020 mm)
- Width: 75 mm (folded stock 90 mm)
- Height: 197 mm (without scope)
- Barrel diameter: 22 mm

CR 308

CR 308 / CR 6,5 / CR 300

Semiautomatic Rifle

New - now available also in 6,5mm Creedmoor and .300 Blackout

Bigger and stronger: The CR variant in calibre .308Win. / 7,62 x 51 mm NATO can fall back on the higher performance capacities of this universal widely used cartridge. The dimensions of the rifle are adjusted to the calibre, apart from that, it is functionally and economically equivalent to the Haenel CR 223 series. Optional: the single-stage trigger can be replaced by a pressure point trigger.

TECHNICAL DATA

- Action: indirect gas operated
- Caliber: .308 Win. / 6,5mm Creedmoor / .300 AAC Blackout
- Ambidextrous charging handle, ambidextrous bolt catch, magazine release left & right
- Flash suppressor A2 standard with QD suppressor mount
- AR-15 telescopic buttstock, 6 stages; takes standard AR-15 milspec stocks

- Hand guard with two NAR and two KeyMod rails, removable without tools
- Polymer back up sights
- Single-stage trigger 28–35 N or pressure point trigger (two-stage trigger) 17–20 N
- Fire pin safety, ambidextrous safety lever, 60°
- Magazine capacity: 10 rounds

BACK TO THE WOODS

HAENEL ▶

The new i-Sight system with removable sights and barrel thread M15x1.

Bolt Action Rifle JAEGER .10

A classic, slim shape – made in Germany

This "state of the art" bolt action rifle, is defined by its cylinder lock, being a utility rifle "par excellence" amongst its class, the JAEGER 10 focuses particularly on uncompromising safety and functionality.

The development team at HAENEL have created a rifle that provides the hunter a reliable companion for the hunting grounds: Robust, intuitive and yet with a straightforward aesthetic. The 2020 vintage of this rifle is enhanced with fine walnut – Back to the Woods. As well as the i-Sight system, which provides flexible sight options.

Typical JAEGER 10: Ready for any situation, with or without suppressor or open iron-sights; the threaded barrel is standard. A rifle for forest, field or open hill made with a passion in Suhl, Germany.

Functional and practical:

- Highly stable 6-lug bolt head runs smoothly in the cold forged receiver.
- The legendary cold-forged Suhl barrels – with variable i-Sight system, threaded barrel and muzzle cap.
- Single stage trigger with set trigger facility (except Varmint/ Compact versions).
- A 3+1 shot magazine can be easily inserted. Another option in .308 Win. is the 10+1 Magazine.
- The two-position safety acts on the trigger rod. The rifle can also be opened when the safety is engaged.
- With a Remington 700 mount preparation – anything can be fitted to it. From Picatinny mounting rail/ rings to the universal Dentler system.

Fast bolt action: an opening angle of 60 degrees is sufficient.

Safety with separate chamber lock - for unloading while in safe condition.

The Jaeger 10 Varmint Sporter is a hunting rifle designed for precision with a semi-weight barrel, a robust synthetic stock, a bipod adapter on the fore-end, a Picatinny rail

and it also features an adjustable cheek-piece – for precise shooting in different positions. Direct trigger. Threaded barrel M15x1
17956. ... from € 1.489,-

HAENEL JGR

Haenel's new JGR suppressor was developed in cooperation with the Swiss specialist B&T. It fits on every barrel with muzzle thread M15x1. The suppressor has been proven to reduce the peak sound pressure of the muzzle sound by at least 30 dB(C) and can withstand 30 shots in a row in a shooting cinema.*

Stalon®

Quality products from Lapland Sweden

Using a silencer eliminates the muzzle blast that occurs in front of the barrel, which reduces noise significantly. STALON is one of Europe's largest manufacturer of suppressors for hunting rifles, located in Swedish Lapland. STALON silencers are made of aluminium. They can be disassembled and most of them are reflex type, i.e. they mostly sit back over the barrel to reduce the weight at the front. STALON silencers are primarily intended for hunting weapons.

STALON Suppressor of the X-Series

Test 4/2021
Price-performance ratio winner "Hunt from a raised hide".

The X-series consists of four different models with varying length, weight and sound reduction adapted for all types of hunting. Common to all models is that the fronts (Front 108 / Front 149) are interchangeable, which means that the front can easily be replaced or supplemented to another model and / or caliber.

XE108, together with the X108, are the two shortest models from the X-series, the more effective XE149 is recommended if maximum sound reduction is needed for magnum/ large calibers.

For the smaller and / or standard calibers, X108 or X149 is strongly recommended.

STALON front and rear modules see www.akah.de

AKAH Neoprene Covers für Stalon

The 3 mm Neoprene cover for the Stalon silencers safeguards your suppressor against scratches and impacts that occur with normal use.

Furthermore, the 1100 Cordura insert mitigates the mirage caused by the heat coming off the suppressor in the target range. The neoprene cover also reduces noise when the repeating rifle gets in contact with other objects.

STALON Suppressor VICTOR / VICTOR L

VICTOR is smaller and lighter but with great performance. **VICTOR** is primarily for smaller calibers from .22 – 6,5mm but even for .308 Win. In comparison with the W-series **VICTOR** is lighter, and thinner with a diameter of 41mm. The suppressor is made crafted in a single piece and has no interchangeable front-module. **VICTOR** is the natural successor of the Compact-series and will be released in two versions **VICTOR** and the extended version **VICTOR-L**.

Made from high quality hard anodized aluminium, thread-inserts and most exposed inner parts are reinforced and made of stainless steel. Available in a wide range of threads.

STALON Suppressor for Rimfire Rifles

Stalon RM

Stalon RM is the small and compact silencer for rimfire calibers. The unique design makes it very easy to dismantle and clean. It is made of anodized aluminium with steel thread insert that provides a very sustainable and durable silencer. Also available for air rifle „F“-versions up to 7,5 Joule.

Stalon RC (Rimfire Core)

Stalon RC silencer developed for small game hunting and shooting, from caliber .17 to .22.

The unique single core construction inside of Stalon RC is designed to reduce weight and noises to a remarkable level but also to simplify the process of cleaning and maintenance.

FREYR & DEVIK

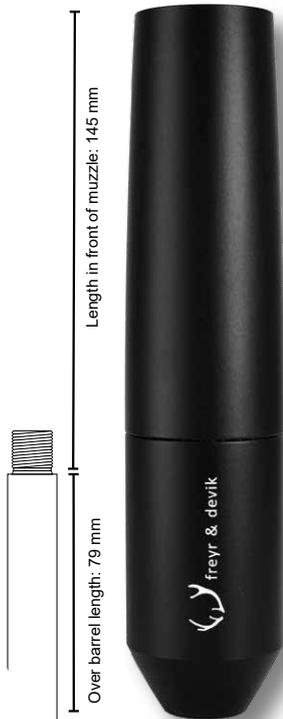

freyr & devik
Sound suppressor technology

DESIGN:

The silencers are in the classic streamlined Freyr & Devik design. The tapered shape is also optimised for strength. It also allows the silencer to glide more smoothly through denser vegetation. The raised exit hole also reduces water entry when hunting in rain. Water entering a fouled suppressor may lead to crystal formation. All Freyr & Devik silencers can be opened easily without the use of tools. This simplifies maintenance, cleaning and drying after hunting in the rain.

MATERIALS:

These silencers utilize Grade 5 Titanium on thread and core of the high-pressure chamber. Here, the temperature can exceed the melting point of aluminium. Titan's superior characteristics in terms of weight, strength and temperature resistance is therefore essential to create a light, robust silencer with longevity. Freyr & Devik is using high-strength aerospace aluminium on the parts that are less exposed to heat, such as encapsulation and anterior lamellas. This is a material with a superior relation between strength and weight, which enables a very light but strong construction.

Test 4/2021
Price-performance ratio winner "Stalking & Mountains". Design award for most attractive model.

Featherweight 269 Titanium

Featherweight 269 Titanium is the silencer for those who need maximum suppression. Even though it has a very high rate of suppression it only weighs remarkable 269 grams. Its light weight makes for excellent handleability and retains the natural balance of the rifle.

Featherweight 196 Titanium

Featherweight Titanium 196 is a truly revolutionary product when it comes to weight and efficiency. Weighing in at only 196 grams it offers the same level of suppression as far heavier and bigger suppressors. More accurately the Featherweight Titanium weighs only 6 grams per dB sound reduction. This translates to a lot of sound suppression in a light and small suppressor. This low weight and size preserves the natural balance of the rifle.

Featherweight 149 Titanium

Featherweight 149 is the silencer for those who are looking for lightest hunting suppressor possible. Weighing in at only 149 grams it still offers a serious level of suppression in a small and remarkably light package. At this weight it has hardly any effect on the natural balance of the rifle. This makes it ideal for driven hunts, stalking and when handling dogs. This suppressor is ideal for smaller calibers.

MARAL SF

The most effective straight-pull action rifle:
safer, more ergonomic, faster.

With all its undeniable experience in making hunting rifles, BROWNING® has innovated yet again in the field of straight-pull action rifles with the new MARAL. A real technical revolution, its quick-loading system offers shooters incomparable speed and unprecedented firing comfort.

BROWNING® combines this new technology with all the experience it possesses in barrel-making and its expertise in safety with its 7-lug bolt, which already equips over a million rifles throughout the world. Efficiency can also be measured when you look at the breech, which is always contained inside the bolt-casing. This enables shooters to keep their target in their sights continuously when firing.

• New trigger system

When you want absolute precision the new trigger system is crisper, shorter and incredibly direct. The trigger system offers you a clear and direct start leading to exceptional experiences.

- **Hand Cocking.** Safety guaranteed.
- **Breech contained inside its casing:** no inconvenience when reloading.
- **Easy, ergonomic handling**
- **Rapid stock dismantling system**
- **Removable magazine** (Nordic & Brown)
- **7-tenon bolt - safety guaranteed**
A bolt renowned for its sturdiness, which guarantees exceptional safety and accuracy.
- **Quick Reloading System**
The servo bolt return system combines maximum safety, speed and efficiency. Thanks to the time gained in the reloading phase, shooters can concentrate on their firing action.

MARAL Composite Nordic HC Adjustable

The Maral SF composite Nordic HC gives prominence to black for its gunstock and fore-end, giving a new look to this rifle which has quickly taken the lion's share of its category. Close to its cousin in brown composite, it is equipped with a threaded barrel (M14x1) and a Nomad Hybrid mounting rail for the telescopic sight. Capacity: 10+1 (.30-06Spr.), 9+1 (.308Win.), 3+1 (9,3x62)
17749.6.. € 2.099,-

MARAL Composite Brown HC Adj.

Here, buttstock, grip and fore-end are brown in contrast to the black of the barrel and the receiver, giving it discretion and distinction. This fine straight-line action rifle with a threaded barrel (M14x1) and an adjustable cheek-piece also has a muzzle brake (T1), which can significantly reduce recoil and the extent of muzzle rise in case of successive shots. The Maral SF Composite Brown HC is designed to receive a telescopic sight with its Nomad Hybrid base rails. Magazine capacity: 10+1 (.30-06Spr.), 9+1 (.308Win.), 3+1 (.300WM)
17749.1.. € 2.329,-
17749.3.. left-hand version € 2.329,-

MARAL Compo Nordic Reflex Adjustable Thr.

The exponential sales of the Maral prove that once you give it a go, you can't say no. This version of the Maral is the Nordic Reflex composite. Nordic refers to the black colour scheme with grey grips, while the term Reflex indicates that it is fitted with a K1 red dot sight from Kite Optics mounted as low as possible to the barrel. Positioning the sight up to 6 mm lower than it would be on the receiver adds that little extra boost to the Maral's natural speed, ergonomics and versatility.
16741.1.. with Kite K1 € 2.675,-

MARAL SF Fluted HC Threaded

Its main assets are its seven-lug bolt, its breech which is always contained inside the bolt and its patented Quick Reloading System. Ideal for both driven hunt and stalking, it is equipped with a fluted barrel, a battue-type rib and fibre optics, a drop-down magazine and a quickly removable stock. This model comes with a threaded barrel for fitting a silencer or muzzle brake.

M14x1

X-Bolt SF Hunter II MC

This model featuring a Monte Carlo buttstock designed for use with scopes. It is available without sights with an M14x1 barrel (also as left-hand version) or with fibre optic front sight and rear sight.

- 16715 ... with thread € 1.245,-
- 16716 ... left-hand version, thread € 1.299,-
- 16720 ... with sights € 1.455,-

X-Bolt SF Composite Black Threaded

The X-Bolt Composite Black comes with an over sized hexagonal bolt knob (changeable in option). The fluted barrel is also threaded (M14x1) ready for an easy mounting of a sound moderator or muzzle brake. An extra 7mm insert is included for perfect shoulder mounting and reduced recoil effect.

- 16728 ... € 1.125,-
- On request left hand version

X-Bolt SF Composite Brown HC Adjustable Threaded

This X-Bolt Composite Brown Adjustable in a brown finish includes an adjustable black comb for an adaptable gun fit. It comes with an over sized two-piece bolt knob. The fluted barrel is also threaded (M14x1) ready for mounting a sound moderator or muzzle brake.

- 16725 ... € 1.349,-

X-Bolt SF

Missing is no longer an option!

The stand-out innovative feature of the X-Bolt SF is the Super Feather Trigger system that gives this rifle a firing quality that feels unbeatable. It also has a new lock-release button that lets the user open the bolt and unload with the safety on.

The new design imparts better balance and highly functional operation in a more compact rifle, while the floating barrel provides the vital finishing touch needed for flawless accuracy.

- **Super Feather Trigger:**
 - zero take-up
 - minimum overtravel
 - minimum creep.
 - Clean, short, crisp and direct.

- **Bolt-unlocking button.**
- **Inflex anti-recoil butt plate**
This extra-soft pad offers the best recoil absorption possible on a rifle. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the butt stock slightly away from your face in order to reduce the recoil and upward motion of the gun.
- **Rotating magazine.**
- **Utmost accuracy**
A free-floating barrel is essential for utmost accuracy. The X-Bolt SF's free-floating barrel is perfect due to double bedding i.e. positioning of the barrel / breech block assembly at two points with respect to the forearm, at the front and at the rear.

X-BOLT

Comes without scope.

BAR MK3 Hunter Gold

BAR MK3

BAR MK3 Eclipse Fluted

BAR

The most reliable semi-automatic in the world

Browning is the undisputed leading specialist of semi-automatic rifles, with 50 years of experience in the field. It owes its title to the quality of its firing mechanisms, the gentle gas-operated action that results in minimum recoil feel, its reliability, but also, and most importantly, to the fact that it has always moved ahead to bring you ever-higher performance.

- **New trigger system - for crisper, shorter and incredibly direct**

When you want absolute precision the new trigger system is crisper, shorter and incredibly direct. The trigger system offers you a clear and direct start leading to exceptional experiences.

- **Interchangeable butt-plate:**

The Bar and Bar Zenith are fitted with interchangeable anti-recoil butt plates Inflex II of different thicknesses are available: 1.2cm, 2.0cm and 2.5cm. These butt plates enable you to adjust the length of your stock without any difficulty.

- **Hand Cocking System - safety guaranteed**

The manual cocking system lets you literally cock your rifle, by moving the arming plunger forwards, which puts the hammer springs under load. Your gun is now ready to fire. You can disarm your gun just as easily by pushing the button.

- **Removable magazine**

BAR MK3 Hunter Gold

The contrast between the black receiver and the gilt flash of the logo will appeal to your finer taste. Add in the grade 2 oil-rubbed wood and you have a rifle you will be proud to take to your post.

MAXUS 2

The reference among gas operated shotguns
- softest shooting semi-automatic ever!

- Speed Load Plus - the value added extra you only get from Browning.**
 Every second counts when you're hunting small game. Speedloading is a Browning proprietary technology that saves you precious time. When you insert the first cartridge into the magazine with the breech open, it is chambered straight away and the bolt springs shut.
- Power driven gas system.**
 The Power Drive Gas System uses larger escape valves to remove gas more quickly with heavy loads. A brand new patented design for an integrated valve keeps residue out side the mechanism for cleaner functioning. The piston has a run increased in length by 20% to make it even more reliable with light charges. The system works with loads of 24g to 64g.
- Magazine cut-off**
 The magazine cut-off for unloads and replaces the chambered shell with a new load without having to cycle the new shell from the magazine.
- Fully balanced gun.**
 The perfect balance of the Maxus II will give you an even more natural swing!
- Fully adjustable stock.**
 The drop and cast of the Maxus II can be altered using the six spacers included in the box, as well as the 7 mm stock insert and 32 mm Inflex II recoil pad.
- Full comfort stock.**
 The Inflex II is one of the best performing recoil pads on the market, directing the force of the recoil downwards and away from the shooter's cheek. The stock also features a Reactar gel cheek piece for even better face protection, especially when firing high-gram cartridges.
- Ergonomics.**
 Overmoulded forearm and pistol grips keep the gun securely in your hand even when it's raining. The oversized bolt handle and trigger guard make the Maxus II easy to handle, even with gloves on.
- Versatile.**
 The Maxus II delivers outstanding performance in any setting. This shotgun comes with 5 Invector+ chokes for your every need. The Maxus II is also capable of firing a wide selection of hunting cartridges, from 28 grams to the largest loads available in gun stores.

MAXUS 2 Composite Black CF

A5 One

A5 Grand Passage MAX5

A5

Built to last: 100.000-round warranty!

The A5 has been designed to offer unmatched reliability, speed and low-recoil feel in a semi-automatic inertia shotgun.

• INFLEX II

The Inflex II Technology recoil pad is the next generation of the most recoil absorbing pad available. A softer new outer material provides even better recoil absorbing performance and is super slippery to prevent snagging on clothing when shouldering. This second generation has added a new absorbent material that slips perfectly on clothing.

• Humpback

Made from lightweight, aeronautic quality aluminium alloy, the A5's receiver is sturdy and its characteristic shape is much more than just a nostalgic return to the past. The receiver's familiar humpback shape fits perfectly with the rib for lengthening your line of sight and in this way helps you to aim naturally with faster targeting.

• Reloading system

The patented Speed Load Plus loading system sends the first shell in the magazine directly into the chamber. In addition, thanks to the rapid unloading system, unloading operations are both simple and fast, without

needing to operate the bolt for sending each shell into the chamber.

• Kinematic Drive System

The system accumulates recoil energy and converts it into a mechanical movement for actuating moving parts. The beauty of the Kinematic Drive™ system resides in its simplicity of design, which enables it to operate in a regular, reliable way, with any type of load, and under all extreme conditions of weather, temperature, moisture or fouling.

• Vector Pro™ barrel

The principle of the Back-bored™ Vector Pro™ barrel is to improve the diameter of the bore of the barrel and to extend the forcing cone which provides three advantages:

- increased speed, improved pellet penetration
- improved pellet grouping
- reduced recoil.

• Chokes

The Invector DS™ Cal 16 chokes provide unrivalled performance by providing an optimal length of 72 mm, an exclusive internal shape and a patented gas seal segment.

A5 One

The A5 One is the starter version of the A5 family, with an understated receiver that is enhanced by the walnut stock and fore-end. It features all the technical specifications behind the success of the A5.

12591.012 / 12592.012

€ 1.455,-

A5 Grand Passage MAX5

Here is the terror of all wildfowl and pest birds! The A5 in 12/89 is equipped with its famous Invector DS chokes and with Cerakote coating: the barrel, receiver and breech handle have all been treated with this ceramic-based technology that protects them against natural wear and corrosion. Moreover, its Camo MAX-5 composite gunstock and fore-end continue to make it the duck and pigeon shooter's ideal companion!

12603.312 / 12604.312

€ 1.665,-

A5 Ultimate Partridges

A blend of innovative technology and aesthetic appeal. The nickel-plated receiver features finely engraved partridges in flight. The A5 is also impressively specced, with a Back-bored! Vector Pro™ Invector DS™ barrel, INFLEX II recoil pad and the new Kinematic Drive System. The grade-3 walnut stock has an oil-rubbed finish.

B 725

B725 Hunter Grade 5

All B725 shotguns are available as left handed versions without surcharge on request.

B725

Innovative over-and-under shotgun with legendary reliability!

The Browning B725 is an aesthetic and technical revolution in over-and-under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding over-and-under shotgun on the market.

• INFLEX II recoil pad

A Inflex II recoil pad is fitted on all B725 shotguns as standard. This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. This exclusive material makes shouldering easier. Two other pads, 20mm or 25mm thick (available as an option), make it easy to adjust the length of your stock. In this way, you can adapt your B725 to your own physique and also adapt it depending on the hunting season.

• New high-performance mechanical trigger system

This new firing system is shorter, faster and lighter giving more control over your shooting. Browning's innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

• Low action frame

The low action frame provides the following benefits when shooting. It enables faster aiming and therefore more instinctive shooting. Thanks to the frame's inline recoil providing a more comfortable shooting position, it reduces muzzle flip and makes for good manoeuvrability and effectiveness when shooting. 10 years guarantee action frame.

• Back-bored Vector Pro™ barrel

The principle of the Back-bored™ Vector Pro™ barrel is to improve the diameter of the bore of the barrel and to extend the forcing cone which provides three advantages:

- increased speed, improved pellet penetration
- improved pellet grouping
- reduced recoil.

• Invector DS™-Chokes

The new Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80 mm, an exclusive internal shape and a patented gas seal segment.

B725 Game 12M

The action frame of the B725 Game is made of steel and features a number of highly attractive wheel-engraved scenes. The nitride finish affords a grey look that is especially pleasing on the eye. The B725 Game includes grade 3 Turkish walnut and is fitted with a new stock that further enhances the ergonomic characteristics of a B725 that has nothing more to prove. Comes with 5 DS chokes.

B 525 SPORTER

B525

Hand fitted to create the best there is.

During the making of a B525, the gun moves from one gunsmith to the next to be entirely hand finished, thanks to the expertise acquired over many years by each of the gunsmiths. This is the only shotgun on the market at this price level that is hand fitted during production to such a high performance level, making each shotgun truly unique.

Fitting important parts (barrel, action frame, forend) is done by hand using traditional methods (using red ochre) so as to make the Browning B525 the reference in shotguns. The attention paid to detail when manufacturing and fitting every Browning B525 is unique, just like the "Browning feeling" when the gun locks on closing before shooting.

- **Flawless mechanics for outstanding reliability**
 - Action frame made from indestructible forged steel.
 - Extra-wide flat bolt and hinge pin.
 - Impact wheel ejectors for cleaner ejection.
 - Chrome-plated barrels and chambers.
- **Inflex II recoil pad**
- **Back-Bored barrel**
The Back-bored™ barrel has an increased internal bore diameter and longer forcing cone. One barrel, two features, three benefits: greater velocity and better penetration / shot grouping and reduced recoil.
- **Investor Plus chokes**

B525 New Sporter One 12M

Besides its Back-Bored Vector Pro barrels, its 10mm battue rib and the oil-rubbed finish of its grade 2 walnut elements, the B525 Sporter 1 possesses 4 Investor + chokes and the Auto Safety system. Just as efficient for sporting clays as for hunting, the B525 Sporter 1 does not lose in aesthetics everything it has gained in reliability: the magnificent autumn scene engraving that adorns its metal surfaces just goes to prove it.

B725 Sporter

B725 Sporter Grade 5

B725 Sporter

Style and technique in perfect balance!

The Browning B725 is an aesthetic and technical revolution in over-and-under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding over-and-under shotgun on the market.

• **INFLEX II recoil pad**

A Inflex II recoil pad is fitted on all B725 shotguns as standard. This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. This exclusive material makes shouldering easier. Two other pads, 20mm or 25mm thick (available as an option), make it easy to adjust the length of your stock. In this way, you can adapt your B725 to your own physique and also adapt it depending on the hunting season.

• **New high-performance mechanical trigger system**

This new firing system is shorter, faster and lighter giving more control over your shooting. Browning's innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

• **Low action frame**

The low action frame provides the following benefit its when shooting. It enables faster aiming and therefore more instinctive shooting. Thanks to the frame's inline recoil providing a more comfortable shooting position, it reduces muzzle flip and makes for good manoeuvrability and effectiveness when shooting. 10 years guarantee action frame.

• **Back-bored Vector Pro™ barrel**

The principle of the Back-bored™ Vector Pro™ barrel is to improve the diameter of the bore of the barrel and to extend the forcing cone which provides three advantages:

- increased speed, improved pellet penetration
- improved pellet grouping
- reduced recoil.

• **Invector DS™-Chokes**

The new Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80 mm, an exclusive internal shape and a patented gas seal segment.

B725 Sporter 12M

The B725 feels incredibly balanced, light and swings fast. The grip is comfortable, the forearm is compact, narrow and places your front hand closer to the bore line for superior hand eye coordination and pointability. The gunstock is also ready to accommodate counterweights (not included).

VECTORPRO
INVECTOR DS

INFLEX TECHNOLOGY II BACK-BORED

B725 Pro Trap Adjustable 12M

This sports shooting rifle includes all the special features that made the B725 Pro Trap a success: the Back Bored Vector Pro barrels, 12 mm top rib, Hi-Viz sights, and a wide selection of 8 Invector DS Extended chokes. Browning has pushed performance potential to the extreme by adding two striking innovative developments to this famous model's original qualities, and further enhancing the balance of this over-and-under shotgun that was designed to be an extension of the shooter's body: a fully adjustable cheek piece; and a stock and barrel assembly with the Pro Stock and Barrel Balancers technologies respectively. The result is a B725 Pro Trap that is fully adjustable!

12358.012 76 cm

12359.012 81 cm **€ 4.460,-**

B725 Pro Shooter and gun as one!

The B725 Pro range has been designed to provide a perfect gun fit whether you're shooting sporting or compact.

• PRO BALANCE System

The Pro Balance System allows shooters to fine-tune the balance point for a perfect mount and swing. Adding weights (optional) to the stock helps balance the shotgun, aids follow-up shots and the additional mass reduces felt recoil.

• Interchangeable recoil pad

The B725 Pro range is supplied with interchangeable 15, 20 or 25 mm recoil pads. They will enable you to adjust the length of your stock without the slightest difficulty.

• TRIPLE TRIGGER System:

The Triple Trigger System fine tunes finger-to-trigger reach on target models. Includes three trigger shoes: Wide checkered, narrow smooth and wide smooth canted.

• Invector DS™-Chokes

The new Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80 mm, an exclusive internal shape and a patented gas seal segment.

WILDCAT SA .22LR

Wildcat SA .22lr

Wildcat SA .22lr

A .22 LR semi-automatic rifle that is set to become a reference in its sector. Its main features are:

- Lower receiver is easily to remove.
- The magazine ejects right into your hand.
- The slide lock button on the front of the trigger guard allows you to manually lock the action open for added safety during storage or transporting.

- A highly ergonomic ambidextrous moulded polymer stock with skeletonized buttstock, upright ribbed pistol grip and rugged textured matte finish.
- Integrated Picatinny top rail. A second Picatinny rail is fitted at the front of the fore-end. A cover protects your hands when the rail is free of accessories.
- Ramped post front sight and Ghost ring rear sight.

Technical data:

Caliber: .22 Lr.; Capacity: 10+1
Rate of twist: 1,8"; Thread: 1/2-20"; Weight: approx. 3,2 kg

24112.000 barrel length 420 mm (16,5")

24113.000 barrel length 430 mm (18") € 470,-

SXR 2

WINCHESTER

SXR 2 - new features:

- Redesigned pistol grip to give you the perfect grip.
- Ambidextrous palm support.
- Fresh and dynamic new style checkering for a firmer hold.
- Comes with the Inflex II recoil pad, which is outstandingly flexible and absorbs recoil like no other.
- Stock inserts for vertical and lateral stock adjustment.
- Fore-end: 10% more tapering to ensure total control of the gun.
- New slide catch.
- Open sights: new front and rear sight for instant target acquisition.

SXR 2 - reliable, practical, effective!

SXR 2 Field

This wood version of the SXR 2 comes with a new stock that is perfectly sized for an impeccable feel in the hand. As with all the SXR 2 versions, the FIELD comes with a slide catch control for improved safety and greater ease of use.

16880 from € 1.290,-

SXR 2 Composite

The flowing lines and modern checkering set the SXR 2 Composite apart.

AKAH Rifle Rest

Protection of registered design
GM 202005003219.0

The models on the market couldn't convince us. That's why we developed our own rifle rest and applied it for patent protection.

This distinguishes us from our competitors:

- Made of soft moose leather
→ fixes the rifle very well.
- The moose leather is impregnated
→ does not absorb water.
- Bottom side is padded with non-slip rubber
→ absolutely skid resistant.
- Lateral extensions are weighted with lead strips
→ for additional skid resistance.
- The rubber facing is removable which enables the hunter to change the filling.

67593 € 69,-

AKAH Stock-Cap

- inserted bottom
- hand-made by skilled AKAH leather craftsmen
- quality full grain leather,
- comfortable felt upholstery
- fits to all stocks.

Mind this brand ...

AKAH leather craftsman at work.

... when buying leather goods for hunting. It guarantees quality AKAH leather, genuine workmanship of trained craftsmen, quality hooks made in Germany.

Luxurious AKAH Gun Cases - famous all over the world since more than 166 years

They show the know-how of the AKAH-saddlers. Before AKAH starts manufacturing such an exquisite case, a detailed discussion with the customer must precede.

- The AKAH-carpenter makes the wooden case.
- Each case fits exactly to one single gun and the accessories.
- High quality brass fittings and combination locks.

- Optics are protected by soft felt or velvet lining.
- Handmade grips by our saddlers. This will last at least some generations.
- The leather cover is individually chosen by the customer.

A second look will confirm all details are masterly done - each case is unique.

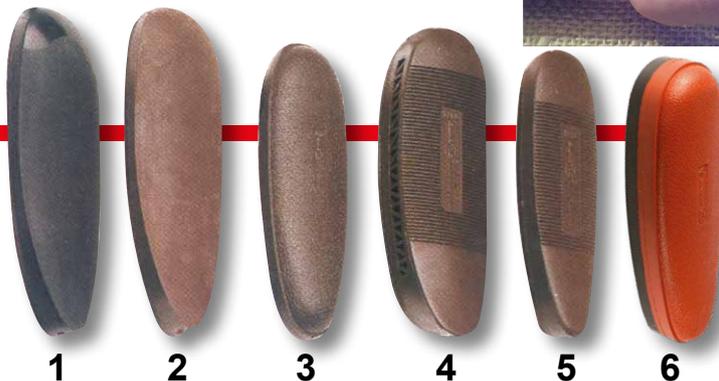

GUN PLUGS

Protect the barrel from rain and dirt.

The gun plugs were developed in cooperation with experienced trackers. They protect firearms from rain, dirt and other contaminants that can not be harmless. The Gun-Plug is simply propelled out of the barrel by the shot air pressure between bullet and plugs. For cleaning purposes, remove easily the Gun-plug with fingernails. It is variable usable from caliber 7 mm to 9.3 mm. 10 pieces, consisting of five yellow and five red plugs.
